SHREYASH GAVADE

AI & DATA SCIENCE ENGINEER

shreyashgavade7@gmail.com +91 9356997428 Kolhapur, Maharashtra 416103

linkedin.com/in/shreyash-gavade-957608

OBJECTIVE

Aspiring AI & Data Science Engineer with hands-on experience in machine learning, data analysis, and backend development. Proficient in building predictive models, data preprocessing, and working with real-world datasets to extract actionable insights. Skilled in programming languages like Python and Java, along with database management and API development. Passionate about leveraging data-driven decision-making to solve complex problems and develop scalable, efficient solutions. Seeking an entry-level opportunity to contribute to innovative projects while continuously enhancing technical and analytical skills.

WORK EXPERIENCE

Sunbeam Infotech 12/2025 – 01/2026
Machine Learning Intern Pune, India
- Developed ML models using Python (NumPy, Pandas, Scikit-learn) on real datasets
- Performed data preprocessing, feature engineering, and model evaluation
- Applied data structures for efficient data handling and analysis.
- Worked with structured datasets and basic database connectivity

EDUCATION

DKTE Society's Textile and Engineering College, Ichalkaranji 05/2027
Bachelor of Technology: Artificial Intelligence and Data Science Ichalkaranji, India

Shri Balaji Madhyamik Vidyalaya Ichalkaranji 04/2023
12th (HSC) Ichalkaranji,India
GPA: 59.00%

Shri Padmaraje Vidyalaya Shirol 04/2021
10th (SSC) Shirol,India
GPA: 87.20%

SKILLS

- **IT Proficiency** — Java programming | Python programming | C programming | C++ programming | C# programming | SQL programming | HTML5 | CSS3 | JavaScript | Database management | Web application development | Software development
- **Programming & Development** — Object-Oriented Programming (OOP) | Data Structures & Algorithms | Web development using HTML, CSS & JavaScript | Node.js development | Express.js framework | MySQL database management | Data manipulation with SQL | JDBC connectivity | Responsive web development | GitHub collaboration
- **Machine Learning** — Python for Machine Learning | NumPy | Pandas | Scikit-learn | Matplotlib | Seaborn | Data cleaning and preprocessing | Exploratory Data Analysis (EDA) | Feature engineering | Data visualization | Supervised learning | Unsupervised learning | Classification algorithms | Regression algorithms | Model building | Model training | Model evaluation | Model optimization | Performance metrics | Data preprocessing
- **Interpersonal Skills** — Strong verbal communication | Written communication | Team collaboration | Focused listening | Time management | Adaptability | Leadership | Critical thinking | Independent working | Attention to detail | Problem-solving | Commitment to continuous learning
- **Core Strengths** — Logical problem-solving | Analytical thinking | Critical analysis | Debugging and troubleshooting | Software development | Database management | Model evaluation | Fast learner | Strong work ethic | Decision making | Multitasking | Self-motivated

CERTIFICATIONS

- AI-ML Virtual Internship (EduSkill, 11/2025)
- Data Analytics Job Simulation (Deloitte, 03/2026)
- McKinsey Forward (McKinsey & Company,07/2026)
- Data Visualization: Empowering Business with Effective Insights (TATA, 03/2026)
- Foundation of Feature Engineering-(CodeSignal, 09/2025)
- Design Technology and Innovation (NPTEL)

PROJECTS

TrustTrip – AI-Powered Smart Travel Assistant 04/2026 – Present
Developed a Flask-based web application for travel assistance with complaint tracking, crowd analysis, and chatbot support. • Integrated SQLite and smart features like price checking and priority detection to improve the travel experience.

Insurance Prediction System 12/2025 – 01/2026
- Developed regression model to predict insurance costs
- Applied feature engineering and model optimization techniques

Nagar-Seva-Complaint-Register 02/2026 – 05/2026
• Developed a regression model to predict insurance charges based on factors such as age, BMI, smoking status, and region. • Applied feature engineering, data preprocessing, and model optimization techniques to improve prediction accuracy and overall model performance.
